Document Number 1

Entry 1 of 1

File: USPT

Sep 7, 1999

DOCUMENT-IDENTIFIER: US 5950195 A

TITLE: Generalized security policy management system and method

DEPR:

In one embodiment ruleset 200 includes a URL filter parameter. One of the values included in an ACL query could then be the URL that the user is trying to access. Ruleset 200 would then include entries for particular URLs or groups of URLs that have been banned or restricted. In one embodiment, a rating service such as WebTrack.TM., available from Webster Network Strategies.TM. could be used to filter URLs. In WebTrack.TM., URLs are grouped into categories based on hate speech, sexually explicit material, etc. The ACL ruleset could then be used to restrict or ban access to categories of URLs.
